Predictive Services Discussion: Scattered thunderstorms this weekend are expected over much of northern California, the Pacific Northwest, Sierras and far western Nevada. The thunderstorms will be initially dry but should become wetter with time. Southern California will be hot and dry. A mixture of wet and dry thunderstorms will continue over Arizona and New Mexico. Hot weather and a few thunderstorms are on tap for the Great Basin and western Colorado. Much of the Southeast will see scattered showers and thunderstorms this weekend.

Lookouts

Lookouts are often better situated to notice the cumulative changes of fire behavior.

● Fire Order #8 says, "Establish lookouts in potentially hazardous situations." Should you utilize lookouts at all times?

- Lookouts should be posted at all times.

● What are you looking for when you are selecting a lookout location?

- Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
- Utilize aircraft if they are available, but only as a complement to established lookouts on the ground. Never rely exclusively on aircraft as your lookout.

● What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?

- Experienced firefighter.
- Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
- Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
- Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.

● What is the necessary equipment for a lookout?

- PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, and water.
